## Wall Mount

### LytePro Wall

LPW7

Small Wall Mount

## LytePro Wall LPW7

### Installation Instructions

<p>1 Fixture can be mounted to 3-1/2" recessed and surface junction boxes, or directly to a surface without the use of a junction box. This fixture is approved for internal splicing.</p>	<p>2 Remove appropriate knockouts in mounting plate and gasket. Install adhesive gasket to back of mounting plate.</p>	<p>3 Install mounting plate to wall or junction box using hardware supplied by others. Use integrated bubble level to ensure plate is level.</p>	<p>4 Connect black wire to the 120v-277v supply lead. Connect white wire to the supply common lead. Connect supply ground lead. Hook fixture onto mounting plate &amp; ensure wires are not being pinched between housing &amp; mounting plate. Secure with supplied screw.</p>	<p>5 Place a bead of caulk on the top and side edge of fixture between the housing and wall.</p> <div data-bbox="1317 1129 1495 1255" style="border: 1px solid black; padding: 5px;"> <p><b>WARNING:</b> Never attempt to adjust or service unit with power on. Make sure fixture is cool before servicing.</p> </div>
