GENLYTE SOLUTIONS

Energy Solutions

Genlyte Solutions sets the standard in high-performance, low-maintenance lighting designed to support your vision.

Lighting upgrades provide a significant opportunity to drastically reduce energy costs and cut ongoing operations and maintenance expenses. As the global leader in lighting for more than 125 years, we have the know-how and the most comprehensive portfolio of energy efficient technology to meet the needs of almost any application.

We have taken the time to select the top product configurations designed for your energy retrofit projects and are happy to support you from photometry to packing and shipping. Please reference QR codes throughout the brochure for full product offerings and specification documents.

How we Support your Projects

24/7 Project Management Support

Our dedicated sales and project execution teams are in place to help ensure your projects are completed on-time and within budget.

Photometric Designs

We provide photometric designs, confirm code compliance and obtain permits when needed, given all necessary lighting documentation.

Controls Start Up and Contractor Assistance

We meet the design requirements set by GC/EC prior to 3rd party commissioning. If applicable, controls start up will be designed and executed upfront. Upon request, we handle start up of all locations, perform trouble shooting to assist contractor(s) and train staff.

Our priorities and investments

Addressing Challenges, Needs and Trends

The Right Product When Needed

Inventory alignment & forecasting, North American facilities, and ring fencing.

Installation and Design Simplicity

Largest global lighting company, connected solutions team, with a proven track record for results.

ESG Commitment

Our lighting solutions support sustainability goals of Climate & Energy, Circular economy, Health & wellbeing, and safety and security.

Ease of Business

Dedicated inside staff, project management team, agent empowerment, and executive sponsorship.

Extensive Portfolio

From one to one replacements up to connected systems, our team can help you determine the best solution for your customers' applications.

Designed for Your Needs

Our high efficacy products are designed with less packaging to reduce recycling and storage costs, are available in-stock through an extensive and nation-wide distribution network.

PHILIPS   Day-Brite   LIGHTOLIER   Stonco   interact by @ignify   PHILIPS dynalite

PHILIPS

Philips is the leading global brand in professional lighting providing high-quality, energy efficient lamps for commercial indoor and outdoor applications.

We achieved 100% Carbon Neutrality in 2020 and are #1 in LED and connected lighting solutions. We have over 17,750 patents and invest 4.8% of our total sales in R&D which is double our nearest competitor. Partnership is more than sales, LED lighting can reduce energy usage and utility spend by up to 80% when compared to traditional sources.

Reach out to your Genlyte Solutions sales representative for more information on the complete Philips LED lamps portfolio.

Philips EvoKit Click LED Retrofit kits

- Average 50,000hr rated life (L70)[1]

Philips HID Replacement LED lamps
- 80CRI with Universal 120-277V
- Average 50,000hr rated life (L70)[1]

[1] Tested to B50 L70 requirement. LED lifetime means the length of time (in hours) until half of the LED light sources maintain at least 70% of their initial lumen output (B50, L70).

Philips EvoKit Click LED Retrofit Kits

Looking to upgrade your fluorescent troffers to energy-efficient LED? Fast-track project payback with EvoKit. With its low price, reduced project scrap, and simple five-minute install – EvoKit is a more cost-effective solution for renovation projects than a full luminaire replacement.

2x2

2x2

1x4

Why is bulk packaging important?
- Significant waste reduction and reduced storage space (up to 84 kits per pallet)
- Each box contains 4 fixtures and each pallet contains 72 fixtures vs 24 with a competitor

LIGHTOLIER

Lightolier has a legacy of lighitng that began in 1904 and is the long-standing industry leader in architectural downlighting, track lighting, and innovative decorative fixtures.

Products offer a full range of options to suit the needs of budget-conscious retrofits expertly blending aesthetic, performance, and intuitive installation characteristics to deliver value to the minds and hands that are part of building the places and spaces where people live, work, and rejoice.

> Reach out to your Genlyte Solutions sales representative for more information on the complete Lightolier LED portfolio.

ModuLyte LED Downlight
- 90CRI with Universal voltage of 120–277V
- Average 70,000 hour rated life (L70)[1]

Residential Retrofit Downlight LED
- 90CRI with Universal voltage of 120V
- Average 50,000 hour rated life (L70)[1]

Commercial Retrofit Downlight LED
- 90CRI with Universal voltage of 120–347V
- Average 50,000 hour rated life (L70)[1]

1. Tested to B50 L70 requirement. LED lifetime means the length of time (in hours) until half of the LED light sources maintain at least 70% of their initial lumen output (B50, L70).

Lightolier ModuLyte LED Downlight with dual select

Benefit from budget-friendly, commercial grade quality downlighting suitable for renovation, retrofit, and new construction projects.

interact

Interact is a wireless, smart lighting system with luminaire-integrated, connected sensing technology.

Interact can boost energy savings while helping to make spaces comfortable, secure and productive. With its three-tier offering, Interact is ready for every step of your smart lighting journey.

> Reach out to your Genlyte Solutions sales representative for more information on the complete Interact portfolio.

Interact ready devices

- Wide range of high-quality LED lamps, luminaires, sensors and switches
- Enabled with integrated as well as external wireless sensors
- Compatible with third-party, 0-10V and phase-dimming luminaires
- Control receptacle outlets integrate with OpenADR-based demand response programs
- Upgrade possible at any moment by simply adding a gateway to access additional benefits such as the connection of multiple user devices and analytics dashboard

---

Best-In-Class Controls

| Personal Control | Commissioning App | Energy Optimization | Interact Gateway |
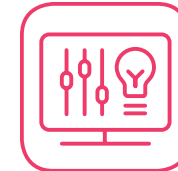

Deep Energy Savings

- Start simple and lay the foundation, connectivity is everywhere and it's the future
- Tap into the full potential of IoT and customize lighting behaviors to optimize performance
- Add a gateway to scale up for more lighting system benefits

- Interact offers three options to make it easy for you to enjoy the benefits of a smart solution
- Use gateways to boost energy savings through BMS integration and monitor usage
- Dwell time options deliver the right light levels when needed

- Enhance general well-being, productivity and sense of security with smart lighting
- Adaptive dimming offers up to 75% energy savings while maintaining occupancy comfort levels

All you need for a smart lighting system

Luminaires with integrated sensors + **Switch** + **Interact Pro app**
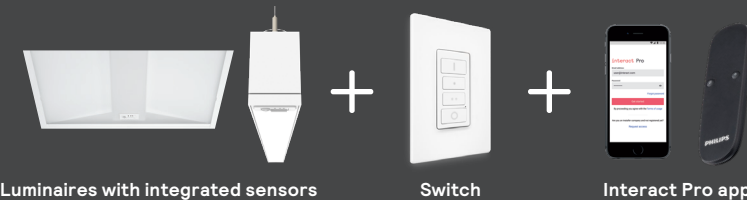

Office lighting needs to facilitate the day-to-day life of people. It must provide a great visual comfort and ambiance, without consuming more energy than needed. The Interact system was developed to deliver high quality, instant-on light that saves energy, is easy to install and future proof.

- **Ideal for refurbishment and new buildings:** No additional control wires needed
- **High flexibility:** customization of the system is possible at any time

- **Fast Installation:** After mounting of luminaire and controls, the system is ready to use in a few clicks
- **No additional cost:** System configuration via free Interact Pro App

- **No local customer IT-Network integration needed:** Commissioning via smartphone app and Bluetooth
- **Perfect for every project size:** No light point restrictions

---

Installation savings

**Up to 80% savings in installation costs[1]**
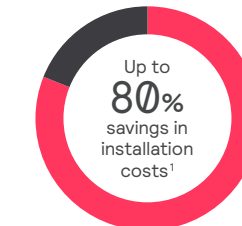

Limit installation efforts to 1:1 lighting changes from fluorescent to LED with luminaire level lighting controls. No control wires and no need for ceiling access. No extra wiring, connectors, copper, or tubes.

Up to 35% savings in commissioning costs[1]

Spend less time onsite with setups thanks to an intuitive App and IR based commissioning process. Create flexible wireless lighting zones and sensor behaviors to meet your customer's needs.

Energy savings

Up to 75% energy savings[2]
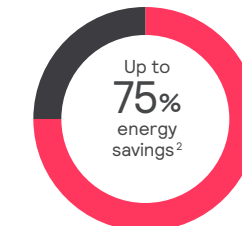

Adaptive dimming and dwell time features enable the system to adapt to occupancy patterns in real time – delivering deep energy savings while maintaining occupancy comfort levels. This system can help you boost your energy savings, reach your sustainability targets and enhance occupancy comfort levels immediately.

Code compliance

| ASHRAE | DLC LISTED | TITLE 24 COMPLIANT | ICC |

Meet the latest building codes
Qualify for utility rebates with luminaire level controls:
- Cyber security certified as per IEC62443-4-1
- Meet building codes (ASHRAE, Title 24, IECC)
- No IT, No gateways, No wiring
- Touchless controls
- DLC compliant

1. Versus legacy systems based on installer interviews.
2. Based on installation in the GSA-operated Metcalfe Federal Building located in Chicago, Illinois. This project was installed under the GSA Green Proving Ground Program. https://www.assets.signify.com/is/content/Signify/Assets/philips-lighting/united-states/20201013-gpg-findings-integrated-with-alc.pdf
3. Check with your distributor for details.

Fast
Complete projects quickly

Simple
Easy to install, easy to configure

Wireless
No extra wiring needed

Scalable
Adaptable to your end user's needs

Learn more at: www.interact-lighting.com

Get connected in five simple steps

1. Unbox

2. Install
Interact Ready luminaires, retrofit kits or lamps

3. Download
Interact Pro app

4. Configure
Interact Pro app to the system

Optional

5. Manage
your project remotely by adding a gateway
